

APP A 37

What is claimed is:

1. An instrument for contemplation comprising:

a medium capable of displaying a character;  
a main unit that is provided on the medium, the main unit including  
a subject displaying cell that displays a subject, and a plurality of thought  
results displaying cells that are positioned in visual connection with the  
main unit and that display a plurality of thought results found from the  
subject; and

a sub unit that is provided on the medium in visual connection with  
the main unit, the sub unit including a new subject displaying cell that  
displays one of the thought results as a new subject, and a plurality of new  
thought results displaying cells that are positioned in visual connection with  
the new subject displaying cell and that display a plurality of new thought  
results found from the new subject.

2. An instrument for contemplation as set forth in claim 1, wherein the  
medium includes a paper that is capable of being printed the main unit and  
the sub unit, and

the instrument for contemplation further comprises a bending  
portion used for bending the paper at the boundary between the main unit  
and the sub unit, and a cutting portion used for cutting a part of the paper  
at the boundary between a sub unit and another sub unit adjacent thereto.

3. An instrument for contemplation as set forth in claim 2, wherein  
the back of the paper is printed a supplementary cell for one of a  
thought result displaying cell in the main unit and a new thought result  
displaying cell in the sub unit.

4. An instrument for contemplation comprising:

a medium capable of displaying a character;

a subject displaying cell that is provided on the medium, the subject  
displaying cell displaying a subject;

a thought unit that is provided on the medium, the thought unit  
including a plurality of thought result displaying cells that display a  
plurality of thought results found from the subject; and

a plurality of selecting units that are provided on the medium, the  
plurality of selecting units displaying a predetermined number of thought  
results selected among the thought results displayed in the thought unit,  
wherein each selecting unit includes an upper selecting unit that  
displays the thought results selected among the thought results displayed in  
the thought unit, and a lower selecting unit that displays a plurality of  
thought results selected among the thought results displayed in the upper  
selecting unit.

5. An instrument for contemplation as set forth in claim 4, wherein  
the thought unit is divided into a plurality of sub thought units that

display a plurality of thought results, and

the number of the sub thought units and the number of the selecting units are decided in such a fashion that the former number and the latter number are added to each other to be equivalent to the number of the participants for a meeting.

6. An instrument for contemplation comprising:

a medium capable of displaying a character;

a thought unit that is provided on the medium, the thought unit displaying a plurality of thought results found from a subject;

a rank sorting unit that is provided on the medium, the ranking sort unit displaying the plurality of thought result, the plurality of thought results being ranked according to a given criterion and being sorted according to the ranks thereof;

a ranking unit that is provided on the medium, the ranking unit displaying the plurality of thought results displayed on the rank sorting unit, the plurality of thought results being ranked according to the criterion and sorted from the upper to the lower; and

a contents sorting unit that is provided on the medium, the contents sorting unit displaying the plurality of thought results that have been ranked, the plurality of thought results being sorted by contents,

wherein the rank sorting unit includes a plurality of cells that display the plurality of thought results and are given the evaluation marks

GOES FOR = 20000000000000000000

corresponding to the ranks thereof, and

the contents sorting unit includes a totaling cell that displays the plurality of thought results that are given the evaluation marks prepared by the participants in such a fashion that the plurality of thought results are sorted by contents, and that displays the total of the evaluation marks corresponding to a plurality of thought results sorted in the same classification.

7. An instrument for contemplation using a computer, the computer being used by one of a plurality of conference participants, the instrument for contemplation comprising:

a subject displaying cell that is shown on the display of the computer, the subject displaying cell displaying a subject;

a thought unit that is shown on the display of the computer, the thought unit including a plurality of thought result displaying cells that display a plurality of thought results found from the subject; and

a plurality of selecting units that are shown on the display of the computer, the plurality of selecting units displaying a predetermined number of thought results selected among the thought results displayed in the thought unit, each selecting unit including an upper selecting unit that displays the thought results selected among the thought results displayed in the thought unit, and a lower selecting unit that displays a plurality of thought results selected among the thought results displayed in the upper

selecting unit,

wherein the units are shown on the display of the computer used by  
the participant in a predetermined order.
